PROFESSIONAL SUMMARY

Data Analyst with 4+ years in compliance, operations and people analytics for a B2B SaaS platform serving 70+ client companies. Advanced SQL, advanced Excel, Power BI (DAX) and dimensional modelling (star schema) on PostgreSQL, with data quality and governance processes in a regulated environment. Analytical modelling and demand forecasting on Google Cloud Platform (BigQuery) and dbt.

PROFESSIONAL EXPERIENCE

Data Analyst / Analyst Programmer · Top Partners S.A. (labour compliance SaaS platform), Chile · Dec 2021 – Jan 2026

Data Analytics and Business Intelligence

- Accelerated compliance report delivery by 40% under Chile's Subcontracting Law (Law 20.123) by automating SQL ETL pipelines with stored procedures, triggers, CTEs and window functions.
- Built Power BI and Tableau dashboards on a star-schema dimensional model with DAX measures, used daily by 70+ client companies and 100+ individual users to monitor contractual compliance.
- Raised automated document verification accuracy above 90% by implementing data quality and governance rules on the SubContrataLey platform, sustaining operations for 70+ client companies.
- Replaced manual document validation with anomaly detection and exploratory data analysis (EDA) routines in Python across the platform's daily document flow.
- Translated requirements from business units and client companies into KPI definitions, reporting specifications and actionable insights for decision-making.

People Analytics (HR)

- Gave the HR team monthly visibility into attrition, absenteeism, headcount by area and workforce evolution through Power BI dashboards, enabling early identification of retention risk.
- Cut manual payroll and attendance consolidation by integrating ERP data and control spreadsheets with Power Query and advanced Excel.
- Modelled employee tenure cohorts and recruitment metrics — time-to-hire, channel effectiveness and probation-period retention — for the talent acquisition team.

PROJECTS

Demand Forecasting and Inventory Optimisation · Personal Project · 2026

- Built an end-to-end analytics pipeline on Google Cloud Platform (BigQuery) with dbt, modelling daily store-product sales in a star schema with 21 passing data quality tests.
- Reduced forecast error by 65% against baseline — WMAPE of 0.159 — benchmarking LightGBM, Prophet and SARIMAX with walk-forward backtesting in Python.
- Minimised total inventory cost at a 95% service level by applying ABC classification and safety stock calculation per store-product.
- Documented assumptions and methodology, and published results in a four-panel Tableau dashboard.

Business Intelligence and Inventory Control · Artisanal Products Market Business · Freelance Engagement (External Client) · Apr – Jul 2026

- Delivered this engagement as an external freelance consultant, defining inventory, sales and procurement KPIs from scratch and leading the business's operational and data modernisation over 4 months.
- Reduced stockouts to near zero by automating daily inventory and sales capture with advanced Excel control models, Power BI and Tableau dashboards on SQL, and a WhatsApp bot with voice-note transcription.
- Eliminated single-supplier dependency by onboarding alternative suppliers and an emergency procurement route.
- Standardised pricing, packaging and weighing formats across the full catalogue, enabling daily margin control by product.

TECHNICAL SKILLS

Data & BI: Advanced SQL (window functions, CTEs, stored procedures, triggers), PostgreSQL, Advanced Excel, Power BI (DAX, Power Query), Tableau, Dimensional Modelling (Star Schema), ETL/ELT, Data Quality & Governance, KPIs and Management Reporting, Descriptive Statistics, Report Automation

Analytics Domains: People Analytics: attrition, absenteeism, headcount, tenure cohorts and recruitment metrics · Supply Chain Analytics: demand forecasting, safety stock, ABC classification

Programming, Cloud & Tools: Python (Pandas, NumPy, scikit-learn, Matplotlib, Seaborn), Google Cloud Platform (BigQuery), dbt, Git, DBeaver, Scrum

EDUCATION, CERTIFICATIONS & LANGUAGES

Data Science Engineering — AIEP, Chile | Currently enrolled, expected graduation 2029

Data Analysis Technician — AIEP, Chile | Currently enrolled, expected graduation 2027

Systems Analysis studies (3 years completed) — Colegio Universitario IES, Córdoba, Argentina | 2021 – 2023

Google Data Analytics Professional Certificate — Google / Coursera, 2026 · Google AI Fundamentals — Coursera, 2026
